PROJECTS DONE

TITLE: BLOOD DONATION MANAGEMENT
Aim: The aim of a Blood Donation Management System is to streamline the process of blood donation by connecting donors, recipients, and organisers efficiently.
Functionality: The Blood Donation Management System allows donors to register, check eligibility, and view donation history, while recipients can request blood . Organisers can schedule and manage blood donation camps.The system sends notifications to donors and recipients and provides rewards for donors
Technology :
Front end- HTML, CSS, JAVASCRIPT
Back end: PHP
DATABASE: MYSQL and Wamp servert
